

1. Make a colour scheme with a main colour, a darker and a lighter tone, and a blue (for eyes)

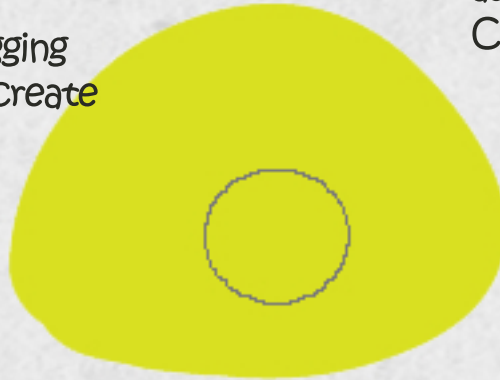

2. Select Blob Brush Tool

Choose the main colour as the Outline/Stroke Colour

3. Click and start dragging the tool around to create a shape.

Tip: Use { and } to decrease and increase brush size!

4. Change Stroke colour to light tone and draw the eyes...

5. Zoom in and draw the teeth

6. To create the shadows, select the eyes, got to **Object > Path > Offset Path**

Choose the amount of offset then fill with a darker tone

7. To soften the edges, select both "eye shadows" and go to **Effects > Stylize > Feather** - choose a subtle feather amount

8. Keep changing colours to draw the eye - then add a black pupil and a white highlight

Finish off with the 2 nostrils!
